CONTENTS OF *ANIMAL FEED SCIENCE AND TECHNOLOGY*, VOLUME 21

VOL. 21 NO. 1 AUGUST 1988

Composition of kermes oak browse as affected by shade and stage of maturity
Z. Koukoura (Thessaloniki, Greece) 1
The effect of dietary inclusion of starch, sucrose and xylose on the utilization of dietary energy in sheep
P. Huhtanen and S. Robertson (Ayr, Gt. Britain) 11
The effect of soluble-glass boluses containing copper, cobalt and selenium on the blood composition of ewes
G. Zervas (Iera Odos, Greece), S.B. Telfer, G. Carlos (Leeds, Gt. Britain) and P. Anderson (Weybridge, Gt. Britain) 23
The utilization by beef steers of a soft high lysine and a hard normal maize cultivar in whole grain feedlot diets
N. Slabbert, M.J. Bolt, T. Shelby and J.P. Campher (Irene, South Africa) 31
Examination of stability, and its effect on the nutritive value, of fish silage in diets for growing pigs
S. Green, J. Wiseman and D.J.A. Cole (Sutton Bonington, Gt. Britain) 43
The feeding value of ammoniated flax straw, wheat straw and wheat chaff for beef cattle
M.E. Mann, R.D.H. Cohen, J.A. Kernan, H.H. Nicholson, D.A. Christensen and M.E. Smart (Saskatoon, Sask., Canada) 57

Book Review
Nutrition 67

VOL. 21 NOS. 2–4 OCTOBER 1988

Special Issue: Utilization and Improvement of Lignocelluloses

Preface iii

The establishment of rumen microbial communities
C.S. Stewart (Aberdeen, Gt. Britain), G. Fonty and Ph. Gouet (Ceyrat, France) 69
In-reactor cellulose conversion
L. Vandevoorde, B. Bruyneel and W. Verstraete (Ghent, Belgium) 99
Genetic variation in the feeding value of cereal straw
B.S. Capper (London, Gt. Britain) 127
Formation and utilization of end products of lignocellulose degradation in ruminants
S. Tamminga and A.M. van Vuuren (Lelystad, The Netherlands) 141
Possibilities of the use of recombinant-DNA techniques with rumen micro-organisms
C.G. Orpin, G.P. Hazelwood and S.P. Mann (Cambridge, Gt. Britain) 161
Production of ethanol from lignocellulosic materials
B. Hahn-Hägerdal, F. Tjerneld and G. Zacchi (Lund, Sweden) 175
Consecutive batch culture — a novel technique for the in vitro study of mixed microbial populations from the rumen
D.J. Gascoyne and M.K. Theodorou (Maidenhead, Gt. Britain) 183

Factors affecting the formation of polysaccharide-degrading enzymes by rumen micro-organisms
A.G. Williams (Ayr, Gt. Britain) 191
Use of the rumen simulation technique (RUSITEC) to compare microbial digestion of various by-products
M. Durand, C. Dumay, P. Beaumatin and M.T. Morel (Jouy-en-Josas, France) 197
Sources of error in predicting digestible dry matter from the acid-detergent fiber content of forages
S.M. Abrams (University Park, PA, U.S.A.) 205
Near infra-red spectra of ammonia-treated straw and of isolated cell walls
R.J. Barnes (Maidenhead, Gt. Britain) 209
Lignin–polysaccharide complexes of the plant cell wall and their effect on microbial degradation in the rumen
A. Chesson (Aberdeen, Gt. Britain) 219
Effect of defaunating the rumen
J.P. Jouany (Ceyrat, France), D.I. Demeyer (Melle, Belgium) and J. Grain (Aubière, France) 229
Possibilities for multipurpose fractionation and alternative uses of plant biomass
O. Theander (Uppsala, Sweden) 267
Chemistry of lignocellulose: methods of analysis and consequences of structure
F.E. Barton, II (Athens, GA, U.S.A.) 279
Upgrading of straw by ammoniation
B.G. Cottyn and J.L. de Boever (Melle-Gontrode, Belgium) 287
Biological structure of lignocellulose and its degradation in the rumen
D.E. Akin (Athens, GA, U.S.A.) 295
